

# KOTTALA YASH

DevOps Engineer

kottalayash2004@gmail.com | +91-9059220361 | github.com/kottalayash | Pune, Maharashtra

## PROFESSIONAL SUMMARY

---

DevOps Engineer with hands-on internship experience designing CI/CD pipelines, containerizing applications with Docker, and orchestrating microservices on Kubernetes. Skilled in provisioning and managing AWS infrastructure using Terraform, automating build-test-deploy workflows with Jenkins and GitHub Actions, and monitoring system health with Prometheus and Grafana. Strong foundation in Linux administration, version control, and cloud infrastructure, with a track record of reducing manual effort through automation. Eager to contribute to a high-performing DevOps team focused on reliability, scalability, and continuous delivery.

## INTERNSHIP EXPERIENCE

---

**DevOps Engineer Intern | Hisan Labs Private Limited, Pune** **Feb 2026 - Jul 2026 (6 Months)**  
*Cloud & DevOps Division*

- Built and configured **CI/CD pipelines** using Jenkins and GitHub Actions, automating build, test, and deployment for faster releases.
- Containerized applications using **Docker and Docker Compose**, connecting services to backend databases for consistent dev and production environments.
- Deployed containerized applications on **Kubernetes** (Minikube and cloud clusters) using Deployments, Services, and HPA for scalable, zero-downtime releases.
- Wrote **Terraform** scripts to provision AWS infrastructure including EC2 instances, VPCs, and S3 buckets, reducing manual configuration effort in sandbox environments.
- Implemented monitoring and alerting using **Prometheus and Grafana** to track application health and infrastructure metrics.
- Pushed and managed Docker images on **Docker Hub** as part of automated CI pipelines with consistent version tagging.
- Configured **GitHub webhooks** to trigger automated build and deployment workflows on every code commit.
- Wrote **Bash and Python** scripts to automate routine infrastructure tasks such as log rotation, health checks, and backup scheduling.
- Administered **Linux (Ubuntu) servers**, including user management, cron scheduling, and UFW firewall configuration; troubleshoot deployment issues with the dev team.

## TECHNICAL SKILLS

---

- Cloud Platforms:** Amazon Web Services (AWS) - EC2, VPC, S3, IAM, EKS | Google Cloud Platform (GCP) | Microsoft Azure
- CI/CD Tools:** Jenkins, GitHub Actions
- Containerization:** Docker, Docker Compose, Docker Hub
- Orchestration:** Kubernetes (K8s), kubectl
- Infrastructure as Code:** Terraform
- Version Control:** Git, GitHub
- Monitoring & Logging:** Prometheus, Grafana, Datadog, AWS CloudWatch

- **Scripting Languages:** Bash, Shell Scripting, Python
- **Operating Systems:** Linux (Ubuntu), Windows Server
- **Databases:** MySQL, MongoDB

## PROJECTS

---

### Easy CRUD - 3-Tier Application Deployment

*Technologies: Docker, Linux, Git, MySQL, Docker Compose*

- Architected a production-grade 3-tier app (React, Node.js, MySQL) using Docker Compose with isolated bridge networking.
- Containerized all layers with Docker, configured persistent MySQL volumes, and used environment-variable-based config to eliminate hardcoded credentials.
- Managed the project lifecycle via Git and GitHub, including feature branching, pull requests, and semantic version tagging.
- Deployed and maintained the app on a Linux (Ubuntu 22.04) server with firewall and environment variable configuration.

### Jenkins CI/CD Pipeline Automation

*Technologies: Jenkins, Groovy, Pipeline-as-Code*

- Authored declarative **Jenkins pipelines-as-code** in Groovy, with a dedicated App-Build-Pipeline for build/test/packaging and a separate Infra-Pipeline for repeatable, version-controlled infrastructure provisioning.

## EDUCATION

---

**Bachelor of Science in Computer Science | Sri Sai Raghavendra College**  
CGPA: 7.21

**2021 - 2025**

## LANGUAGES

---

Telugu, Hindi, English
